On November 18 and 19, 2018, the ADI-R: Autism Diagnostic Interview - Revised training will be run the first time in Poland by the ADI-R certified trainer Dr. Somer Bishop from the Department of Psychiatry, University of California, San Francisco, USA. ADI-R is used for diagnosing autism in children, adolescents and adults. It is useful in planning of treatment and distinguishing autism from other developmental disorders as well.

Dr. Somer Bishop is also the co-author of the other important diagnostic instrument: ADOS-2 Autism Diagnostic Observation Schedule - Second Edition which is used in the assessment and diagnosis of autism.
