SYLLABUS

SUBJECT

Microarchaeology (in English)

TEACHER

Dr Joanna Trabska

COURSE DESCRIPTION

Recognition, research methods and interpretation of micro-traces on archaeological sites: phytolites, charcoal, faunal remains (bones, shells), inorganic remnants (powdery concentrations); material heated and transformed post depositionally. Interpreting of microscopic and micro-chemical data. Case studies. Practice with polarising microscope (PLM).

LEARNING OUTCOMES

Recognition of micro-material with PLM, scanning microscope, spectroscopic methods and X-Ray diffraction. Interpretation of geochemical data.

GRADING POLICY

credit with grade

TIMETABLE

30 hours / summer semester

TEXTBOOK AND REQUIRED MATERIALS

Periodicals:

- Archaeometry,
- Journal of Archaeological Science,
- Geoarchaeology,
- Journal of Human Evolution
- any handbook on geochemistry, galaeobotany, instrumental analysis,
- Weiner S. 2010: Microacheology: beyond the visible archaeological record, Cambridge.
- Reed S.J.B. 2005, Electron Microprobe Analysis and Scanning Electron Microscopy in Geology, Cambridge.

PREREQUISITES

Basic physics, chemistry and mathematics. Basic archaeometry.
