BRIEF DESCRIPTION OF COURSE (100-200 words)				
<p>The aim of the course entitled 'Scientific conference/exhibition/performance' is to prepare doctoral students to actively participate in national and international scientific community events. One of the key elements of a researcher's work, apart from conducting scientific research, is to publish the results of their research, both in the form of articles or monographs, as well as in the form of public presentations at conferences, symposia and scientific congresses among experts. Participation in scientific conferences/exhibitions/presentations also involves the ability to discuss research results, as well as methodological or conceptual limitations. As part of the course, doctoral students will improve, among other things, their presentation skills, public speaking skills and the way they present the results of their own research. At the same time, the content presented by the doctoral student will be subject to broader discussion in order to identify opportunities for initiating scientific debate and conducting a broader scientific discourse related to the discipline of history and the subject of the doctoral student's research, including in a foreign language.</p>
