

SYLLABUS

concerning the cycle of education 2020-2026

(date range)

1.1. BASIC INFORMATION CONCERNING THIS SUBJECT / MODULE

Subject / Module	PHARMACOLOGY
Course code / module *	Fm/C
Faculty of (name of the leading direction)	Medical College of Rzeszów University
Department Name	Department of Experimental and Clinical Pharmacology
Field of study	medical direction
Level of education	uniform master's studies
Profile	practical
Form of study	stationary / extramural
Year and semester	year IV, semester VII
Type of course	obligatory
Coordinator	prof. dr hab. n. med. Piotr Tutka
First and Last Name of the Teacher	prof. dr hab. n. med. Piotr Tutka dr hab. n. med. inż. Dorota Bartusik-Aebisher mgr farm. Patrycjusz Kołodziejczyk

* - According to the resolutions of the Faculty of Medicine

1.2. Forms of classes, number of hours and ECTS

Lecture	Exercise	Conversation	Laboratory	Seminar	ZP	Practical	Self-learning	Number of points ECTS
10	40							4

1.3. The form of class activities

classes are in the traditional form

classes are implemented using methods and techniques of distance learning

1.4. Examination Forms / module (exam, credit with grade or credit without grade)

2. REQUIREMENTS

Basics of knowledge in the field of anatomy, physiology, biochemistry, microbiology and pathology.
 Knowledge, skills and competences of the above subjects according to the program of studies of the first, second and third year.
 Passing semester 6 in the field of pharmacology.

3. OBJECTIVES, OUTCOMES, AND PROGRAM CONTENT USED IN TEACHING METHODS

3.1. Objectives of this course/module

C1	Acquisition of knowledge by the student on the pharmacological action of drugs, indications and contraindications to their use, side effects and interactions between drugs used in the therapy of various diseases
C2	Understanding the mechanisms of action of drugs, their fate in the body and interaction
C3	Acquisition of knowledge and skills to recognize and properly respond to adverse and toxic drug reactions
C4	The acquisition of the ability to use the sources of information on medicines correctly (databases, characteristics of publications) and to interpret the knowledge contained therein
C5	Obtain basic knowledge about the separateness of pharmacotherapy of children, the elderly, pregnant women and patients with liver and kidney damage and the ability to modify drug doses in these conditions
C6	Substantive preparation and shaping of the student's attitude to use knowledge about medicines in clinical practice
C7	Acquiring the ability to save ready-made and prescription drugs
C8	Acquisition of knowledge and skills in the field of treatment of life-threatening conditions

3.2 OUTCOMES FOR THE COURSE / MODULE (TO BE COMPLETED BY THE COORDINATOR)

EK (the effect of education)	The content of the learning effect defined for the subject (module)	Reference to directional effects (KEK)
EK_01	characterizes individual groups of therapeutic agents,	C.W34.
EK_02	knows the main mechanisms of action of drugs and their changes in the system depending on age,	C.W35.
EK_03	determines the influence of disease processes on the metabolism and elimination of medicines,	C.W36.
EK_04	knows the basic rules of pharmacotherapy,	C.W37.
EK_05	knows the more important side effects of medicines, including those resulting from their interaction,	C.W38.
EK_06	understands the problem of drug resistance, including multidrug drug resistance	C.W39.
EK_07	knows the indications for genetic tests carried out to individualize pharmacotherapy,	C.W40.

EK_08	knows the group of drugs whose abuse can lead to poisoning,	C.W43.
EK_09	performs simple pharmacokinetic calculations,	C.U13.
EK_10	selects drugs at appropriate doses to correct pathological phenomena in the body and in particular organs,	C.U14.
EK_11	correctly prepares records of all forms of prescription medicinal substances,	C.U16.
EK_12	uses pharmaceutical guides and databases on medicinal products,	C.U17.
EK_13	knows the rules of pharmaceutical law,	G.W11.
EK_14	recognizes the symptoms of drug dependence and proposes therapeutic treatment,	E.U19.
EK_15	interprets the pharmaceutical characteristics of medicinal products and critically assesses advertising materials regarding medicines,	E.U31.

3.3 CONTENT CURRICULUM (filled by the coordinator)

A. Lectures

Course contents
<ol style="list-style-type: none"> 1. Drugs of the autonomic system part AND 2. Drugs of the autonomic system part II 3. Drugs affecting kidney function. . Drugs used in congestive heart failure and pulmonary edema. 4. Principles of hypertension therapy. Antihypertensive drugs. Treatment of hypertensive crisis. 5. Drugs used in ischemic heart disease. Rules for the treatment of acute coronary syndromes. 6. Antiarrhythmics. Principles of treatment of arrhythmias. 7. Thyroid hormones and medicines used in thyroid diseases. 8. Glucocorticoids. 9. Insulin. Oral antidiabetic medications. Principles of diabetes treatment. 10. Sex hormones. Drugs used in disorders of the hypothalamo-pituitary-gonadal axis.

B. Exercises

Course contents
<ol style="list-style-type: none"> 1. Neurotransmission. Drugs that act on the parasympathetic system. 2. Drugs acting on the sympathetic system (part I). 3. Drugs acting on the sympathetic system (part II). 4. Drugs affecting renal function (diuretics, vasopressin analogs, drugs acting on the renin-angiotensin-aldosterone system). 5. Drugs lowering blood pressure. Principles of treatment of hypertension. Pharmacotherapy for hypertensive crisis. 6. Drugs used in ischemic heart disease. Pharmacotherapy of acute coronary syndromes. Drugs used in plasma lipid disorders.

7. Drugs used in heart failure. Pharmacology of drugs used in resuscitation and cardiovascular emergency. Shock therapy. Drugs used in peripheral blood perfusion disorders.

Test I (material from exercises 1-7).

8. Antiarrhythmics.

9. Hormones of the hypothalamus and pituitary gland. Thyroid hormones. Drugs used in thyroid diseases.

10. Adrenal steroids and their synthetic analogues. Inhibitors of the synthesis and action of adrenocortical hormones.

11. Sex hormones (estrogens, progestins, androgens). Hormonal contraceptives. Principles of hormone replacement therapy.

12. Pancreatic hormones. Oral antidiabetic medications. Rules for the treatment of type I and type II diabetes.

Other drugs affecting carbohydrate metabolism and appetite.

13. Hormones and drugs affecting the calcium-phosphate economy and bone metabolism. Pharmacotherapy for osteoporosis.

14. Recent developments in pharmacology (part I).

15. Repetition of the semester 2.

Test (material from exercises 8-14).

3.4 TEACHING METHODS

Lecture: Problem and information lecture with multimedia presentation.

Exercises: Working in groups. Solving tasks and clinical problems. Discussion. Analysis of clinical cases. Working with a database. Preparing a presentation.

4 METHODS AND EVALUATION CRITERIA

4.1 Methods of verification of learning outcomes

Symbol of effect	Methods of assessment of learning outcomes (Eg.: tests, oral exams, written exams, project reports, observations during classes)	Form of classes
EK_1	oral answer, colloquium, test exam	Lecture, Exercises
EK_2	oral answer, colloquium, test exam	Lecture, Exercises
EK_3	oral answer, colloquium, test exam	Lecture, Exercises
EK_4	oral answer, colloquium, test exam	Lecture, Exercises
EK_5	oral answer, colloquium, test exam	Lecture, Exercises
EK_6	oral answer, colloquium, test exam	Lecture, Exercises
EK_7	colloquium, written exam	Lecture, Exercises
EK_8	oral answer, colloquium, test exam	Lecture, Exercises
EK_9	test exam, written test	Exercises
EK_10	oral answer, colloquium, test exam	Lecture, Exercises
EK_11	oral answer, colloquium, test exam	Exercises

EK_12	oral answer, presentation	Exercises
EK_13	oral answer	Exercises
EK_14	oral answer, colloquium, test exam,	Lecture, Exercises
EK_15	oral answer	Exercises

4.2 Conditions for completing the course (evaluation criteria)

<p>The condition for passing the subject is:</p> <ul style="list-style-type: none"> - presence on all exercises and attendance at lectures - demonstration of knowledge and skills at least on a sufficient level as regards the material in accordance with the program (see substantive content) - demonstrating skills of critical analysis of acquired information and application of pharmacological knowledge in contact with the patient - getting at least a satisfactory grade from passing the final subject <p>Assessment from passing will be the resultant of all learning outcomes, i.e. knowledge, skills and social competences of the student, and will be based on internal regulations, which assumes collecting partial points of students. The point score will include oral answers, written tests (eg in terms of recipes), final tests (minimum two per semester), assessment of activity (assessment of competences and attitudes). The condition for passing the subject and joining the semester 8 and the final exam will be obtaining the minimum number of points determined in the regulations. The final mark in the semester will depend on the number of points obtained. Students who do not get the required minimum number of points will not be able to take part in the 8th semester and the final exam and will have to pass all the material in the form of a test.</p>
--

5. Total student workload required to achieve the desired result in hours and ECTS credits

Activity	Hours / student work
Hours of classes according to plan with the teacher	50
Preparation for classes	
Participation in the consultations	
The time to write a paper / essay	
Preparation for tests	
Participation in colloquia	
Student's own time	80
SUM OF HOURS	130
TOTAL NUMBER OF ECTS	4

6. TRAINING PRACTICES IN THE SUBJECT / MODUL

Number of hours	
Rules and forms of apprenticeship	

6. LITERATURE

<p>READING:</p> <ol style="list-style-type: none"> 1. Brenner G. M., Stevens C. W., Farmakologia, 2010 2. Wielosz M., Receptura dla studentów medycyny i stomatologii, 1998
<p>Additional literature:</p> <ol style="list-style-type: none"> 1. Wojciech K., Zbigniew H., Farmakologia - podstawy farmakoterapii. Tom I i II, 2004 2. Katzung B.G., Masters S.B., Trezor A.J., pod red. Buczko W., Farmakologia ogólna i kliniczna, Tom I i II, 2012 3. Mutschler E., Geisslinger G., Kroemer H.K, Ruth P., pod red. Buczko W., Farmakologia i toksykologia Mutschlera, 2012 4. Rang H.P., Dale M.M., Ritter J.M., pod red. Mirowska D., Farmakologia Rang i Dale, 2014 5. Korbut R., Olszanecki R., Wołkow P., Jawień J., Farmakologia, 2012 6. Brunton L.L., Lazo J.S., Parker K.L. pod red. Buczko W., Farmakologia Goodmana & Gilmana. Tom I i II, 2007 7.
