

SYLLABUS

concerning the cycle of education 2018-2024

1.1. BASIC INFORMATION CONCERNING THIS SUBJECT / MODULE

Subject / Module	Neurology
Course code / module *	N/E
Faculty of (name of the leading direction)	Faculty of Medicine, University of Rzeszow
Department Name	Faculty of Medicine, University of Rzeszow
Field of study	Medicine
Level of education	uniform MSc
Profile	General academic
Form of study	stationary / extramural
Year and semester	year IV, semester 7 and 8
Type of course	obligatory
Coordinator	Prof. Bartosik-Psujek
First and Last Name of the Teacher	Prof. Bartosik-Psujek lek. Marcin Wiącek lek. Bartosz Sieczkowski

* - According to the resolutions of the Faculty of Medicine

1.2. Forms of classes, number of hours and ECTS

Semester No	Lecture	Classes	Conversation	Laboratory	Seminar	ZP	Practical	Self-learning	Number of points ECTS
7	15	30	-	-	-	-	-	-	3
8	15	25							2

1.3. The form of class activities

classes are in the traditional form

classes are implemented using methods and techniques of distance learning

1.4. Examination Forms / module (exam, **credit with grade** or credit without grade)

2. REQUIREMENTS

Knowledge of the anatomy of the nervous system. Knowledge of the physiology of the nervous system.

3. OBJECTIVES, OUTCOMES, AND PROGRAM CONTENT USED IN TEACHING METHODS

3.1. Objectives of this course/module

C1	Mastering theoretical knowledge and practical skills regarding the location and symptomatology of diseases of the central and peripheral nervous system.
C2	Familiarization with the specificity of diagnosis and treatment of the most common neurological diseases of children and adults (management of vascular, neoplastic diseases, inflammatory, degenerative spine, craniocerebral injuries and spinal cord and congenital malformations).
C3	Shaping the ability to carry out subjective and objective examination of a patient with a neurological disease.

3.2 OUTCOMES FOR THE COURSE / MODULE (TO BE COMPLETED BY THE COORDINATOR)

EK (the effect of education)	The content of the learning effect defined for the subject (module)	Reference to directional effects (KEK)
EK_01	He knows and can distinguish between the basic sets of neurological symptoms	E.W13.
EK_02	<p>Knows and understands the causes, symptoms, principles of diagnosis and therapeutic treatment in the most common diseases of the nervous system, including:</p> <p>a) headaches: migraines, tension headaches and headache syndromes, as well as neuralgia of the nerve V,</p> <p>b) cerebrovascular diseases, in particular cerebral infarction,</p> <p>c) epilepsy,</p> <p>d) infections of the nervous system, in particular meningitis, Lyme disease,</p> <p>herpetic encephalitis, neurotransmission diseases,</p> <p>e) dementia, in particular Alzheimer's disease, frontal dementia, vascular dementia and other dementia syndromes,</p> <p>f) diseases of the basal ganglia, in particular Parkinson's disease,</p> <p>g) demyelinating diseases, in particular multiple sclerosis,</p> <p>h) diseases of the neuromuscular system, in particular amyotrophic lateral sclerosis and sciatica,</p> <p>i) cranial-cerebral injuries, in particular concussion.</p>	E.W.14

EK_03	Performs a full and targeted physical examination of an adult patient.	E.U3.
EK_04	Carries out an indicative examination of hearing and visual field as well as an otoscopic examination.	E.U6.
EK_05	Evaluates the general condition, the state of consciousness and awareness of the patient.	E.U7.
EK_06	He is able to establish and maintain a deep and respectful contact with the patient	K.01

3.3 CONTENT CURRICULUM

A. Lectures

Course contents – semester 7
Clinical neuroanatomy. Neurological syndromes. Neurological examination. Discussing the scales and tests used in neurology.
Stroke. Definition and symptoms. Brain circulation. Risk factors. Acute phase management. Role of the Stroke Unit.
Disturbance of consciousness. Coma and confusional states.
Demyelinating diseases.
Disorders of Equilibrium

Course contents – semester 8
Headache and Facial Pain. Discopathy and back pain.
Movement disorders
Seizures and syncope
Neuromuscular diseases.
Dementia and Amnesic disorders.

B. Classes

Course contents – semester 7
Clinical features and differentiation of selected patterns of nervous system damage. <ul style="list-style-type: none"> • Brain damage syndromes, e.g.: hemispheric syndrome, Pseudobulbar palsy, Internuclear ophthalmoplegia, brain stem syndromes, locked-in syndrome, encephalopathy • Cerebellum syndrome. • Myelopathy, e.g.: Brown-Séquard syndrome, the conus medullaris syndrome, posterior spinal cord syndrome, anterior spinal cord syndrome • Myopathy.

<ul style="list-style-type: none"> • Peripheral nerve lesions: e.g. Polyneuropathy, mononeuropathy, radiculopathy, Cauda equina syndrome • The pyramidal tracts damage: localization of the lesion based on clinical symptoms • Sensory tracts damage: localization of the lesion based on clinical symptoms
Neurological examination, subjective and objective examination. Discussing the conclusions of the neurological examination.
Additional tests (laboratory, electrophysiological, radiological and imaging). Cerebrospinal fluid examination, electroencephalography, electromyography, contrast radiological examination, computed tomography, magnetic resonance imaging, PET, SPCT, Doppler ultrasound.
Clinical neuroanatomy: <ul style="list-style-type: none"> • Disturbance of consciousness, • Cortical syndromes e.g. aphasia, Hemispatial neglect, Apraxia • Visual disturbance: localization of the lesion based on vision deficit • Dysarthria, dysphagia • Paresis: e.g. hemiparesis, tetraparesis • Sensory deficit types • Disorders of Equilibrium
Vertigo - Differential diagnosis and management of dizziness.
Headache, facial pain and back pain. Types of pain. Classification of headaches according to the WHO International Headache Association. Primary and secondary headaches. Different back pain causes „Red flag” symptoms

Course contents – semester 8
Neurovascular diseases.
Epilepsy. International classification of epileptic seizures. Emergency treatment of epileptic seizures
Demyelinating diseases. Multiple sclerosis, optic neuritis, neuromyelitis optica, other demyelinating diseases.
Movement disorders.
Disturbance of consciousness. Cognitive functions. Dementia. Alzheimer's disease. Dementia with Lewy bodies, and fronto-temporal dementia.
Neuroinfectious diseases.
Neuro-oncology
Neuromuscular diseases

3.4 TEACHING METHODS

Lecture: multimedia presentation.

Classes : practical exercises, demonstration, lecture form.

Student's own work: working with a book, preparing for classes and preparing for the test and exam

4 METHODS AND EVALUATION CRITERIA

4.1 Methods of verification of learning outcomes

Symbol of effect	Methods of assessment of learning outcomes (Eg.: tests, oral exams, written exams, project reports, observations during classes)	Form of classes
EK_01, EK_02	Written test	Lecture
EK_03, EK_04, EK_05, EK_06	Observation during classes	Classes

4.2 Conditions for completing the course (evaluation criteria)

Semester 7
<ol style="list-style-type: none"> 1. Obligatory and active participation in the classes 2. Obligatory participation in the lectures 3. Positive assesment of the written test <p>Written test evaluation criteria:</p> <p>5.0 - has knowledge of each of the contents of education at the level of 90% -100%</p> <p>4.5 - has knowledge of each of the content of education at the level of 84% -89%</p> <p>4.0 - has knowledge of each of the content of education at the level of 77% -83%</p> <p>3.5 - has knowledge of each of the content of education at the level of 70% -76%</p> <p>3.0 - has knowledge of each of the content of education at the level of 60% -69%</p> <p>2.0 - has knowledge of each of the contents of education below 60%</p>

Semester 8
<ol style="list-style-type: none"> 4. Obligatory and active participation in the classes 5. Obligatory participation in the lectures 6. Positive assesment of the written test <p>Written test evaluation criteria:</p> <p>5.0 - has knowledge of each of the contents of education at the level of 90% -100%</p> <p>4.5 - has knowledge of each of the content of education at the level of 84% -89%</p> <p>4.0 - has knowledge of each of the content of education at the level of 77% -83%</p> <p>3.5 - has knowledge of each of the content of education at the level of 70% -76%</p>

3.0 - has knowledge of each of the content of education at the level of 60% -69%

2.0 - has knowledge of each of the contents of education below 60%

5. Total student workload required to achieve the desired result in hours and ECTS credits

Activity	Hours / student work
Hours of classes according to plan with the teacher	85
Preparation for classes	35
Participation in the consultations and in colloquia	5
The time to write a paper / essay	
Preparation for tests	25
Other (e-learning)	-
SUM OF HOURS	150
TOTAL NUMBER OF ECTS	5

6. TRAINING PRACTICES IN THE SUBJECT / MODUL

Number of hours	-
Rules and forms of apprenticeship	-

6. LITERATURE

COMPULSORY LITERATURE:

1. Aaron L. Berkowitz. *Lange Clinical Neurology and Neuroanatomy: A Localization-Based Approach*, McGraw-Hill Education/Medical, 2017.
2. Geraint Fuller. *Neurological Examination Made Easy*. Elsevier, 2019.
3. David Greenberg, Michael J. Aminoff, Roger P. Simon. *Lange Clinical Neurology*. McGraw-Hill, 2020.

Complementary literature:

1. I. E. Scheffer et al. *ILAE classification of the epilepsies: Position paper of the ILAE Commission for Classification and Terminology*. *Epilepsia*, 58(4):512–521, 2017
