

**PROCEDURES FOR PROTECTING CHILDREN FROM HARMFUL CONTENT AND
THREATS ON THE INTERNET AND IN OTHER FORM**

1. A condition for allowing a minor to use electronic devices with Internet access owned by the University or to use wireless Internet access via the University's Wi-Fi network is that the minor familiarises himself/herself with the rules of safe Internet use.
2. The University makes every effort to ensure that the process of familiarising minors with the rules of safe use of the Internet is effective and meets their capabilities and needs (e.g. by posting them on the website, making them available to guardians, etc.).
3. If dangerous content is discovered on a University electronic device, the appropriate unit determines who was using the device at the time of the violation.
4. If it is determined that a minor was using a computer containing dangerous content, the Rector's Representative shall be immediately notified.
